Mitch,

See below... I let her know that we're all adapting to working remotely and that ISDA may be having trouble with voicemails (like us) getting through.

Just wanted to follow up with you on the complaint I made with you on March 23,2020.What is that dairy up to? They should of had permits for this change and it should have been filed with your office before they started their construction 3 months ago. What is going on? We need to know Ex. 6 PP / Ex. 7(C)
When I spoke with you, you had no idea of what construction was going on at the dairy, you said you would look into it and get back to Ex. 6 PP / Ex. 7(C) know I asked you several things to check into like the hoof dust and the roads that were constructed to exit on to 700 east, these are important too, but this canal water and barn waste and waste ponds being pimped thru these pivots are what we need to know about, this is important that we all know what is going on asap. Please let me know soon. Thank you Ex. 6 Personal Privacy (PP)
